

Involving and Supporting Carers for Staff

This session will look at the legal duties of staff working in acute, community and/or primary care. In particular we will be discussing how staff can encourage carers to recognise their role, how to refer to support services and the legal duty staff have to involve carers in discharge planning. We will also mention some of the systems which help us record information about any known carers and share this with other services.

This Carers Rights Day we want everyone to "know their role" when it comes to involving and supporting unpaid carers.

Do you know yours?
