Cut It Out / Equally Safe at Work: Sexual Harassment People Management Module

Managers, supervisors and clinical leaders can play a significant role in shaping workplace culture and ensuring staff feel safe, respected and able to speak up when something isn't right.

The NHS Greater Glasgow and Clyde (NHSGGC) Cut It Out / Equally Safe at Work (ESaW) sexual harassment [People Management Module](#) is open to managers, supervisors and leaders across NHSGGC, including medical staff, senior nurses, AHPs and HSCP managers who manage or supervise NHSGGC staff. The session provides practical guidance on recognising and responding to sexual harassment and other inappropriate behaviours, supporting staff who raise concerns, and understanding the reporting routes and support available.

Everyone in a leadership, management or supervisory role has a part to play in preventing harm, responding effectively when concerns arise, and ensuring staff feel heard and supported. This module aims to strengthen confidence in dealing with these situations and reinforce NHSGGC's commitment to dignity, respect and inclusion for all.

The module also includes information on the Employment Rights Act 2025 and the requirement for employers to take all reasonable steps to prevent sexual harassment in the workplace.

Please click here to register: [Sexual Harassment \(People Management Module\)](#)

Do you need support and/or advice?

Be Phishing and Vishing Aware!

Phishing and Vishing are forms of social engineering, a technique used to gain access to private information, often via email. It can cause a huge amount of damage, disruption and distress. To help prevent social engineering attacks at NHSGGC and at home, remember **N.E.T.**

NHS
Greater Glasgow and Clyde

No Trust	Educate Yourself	Think First
Verify, via alternative means, the identity of those sending unexpected messages, even if the contacts are known to you.	Complete the Security and Threat module on LearnPro. Check online sources to see if emails, SMS messages or other forms of social engineering attacks are known or commonplace. Remember, educating yourself can protect you in both your work and personal life.	Successful attacks generally require a sense of urgency. Stop! Take a moment to reflect and investigate, this can show these attacks for what they are.

Managing technology and data safely and securely is everyone's responsibility throughout NHSGGC.
