New Counter Fraud Policy and Response Plan

NHS Greater Glasgow and Clyde has now approved a refreshed Counter Fraud Policy and Response Plan that strengthens our commitment to protecting public funds and resources for patient care.

The policy is aligned with best practice guidance used across NHS Scotland and reflects the expectations of national counter-fraud strategies designed to reduce the risk, occurrence and impact of fraud, bribery and corruption.

Every member of staff – regardless of role – plays a part in preventing and detecting fraud.

Your voice matters – please take part and help us strengthen our collective commitment to protecting NHS resources.

Staff should make themselves aware of the policy which you can view [here](#).

Visit our [Fraud SharePoint site](#) for essential guidance, tools and resources to help you identify and report suspicious activity quickly and confidentially.

Message from NHSGGC HEPMA team and Antimicrobial Team

From today, (5 January 2026) we will be introducing mandatory indication recording for five more antibacterials. Currently this functionality is in place for antiviral, antifungal and antiparasitic prescribing. It will initially be introduced for the following antibacterials – Amoxicillin, Clarithromycin, Doxycycline, Levofloxacin and Co-amoxiclav. If you are unfamiliar with this functionality please access the [short training video here](#) (1 minute 05 long).

Mandatory indication recording is being implemented to clearly document the antimicrobial treatment plan for each patient. This enhancement facilitates continuity of care during transitions between wards or departments and enables the multidisciplinary team to discuss the rationale for antimicrobial therapy with patients, without the need to access detailed clinical notes. While prescribers are encouraged to provide the most accurate indication possible, it is recognised that some uncertainty may exist at the time of prescribing. The indication can be updated at any point of the course of treatment to clarify. This is shown in the training video.

Recording of indication for antimicrobials within HEPMA is being introduced across Scotland and is being led by the Scottish Antimicrobial Prescribing Group (SAPG). Recording of indication is one of the key Scottish Government National Antimicrobial Prescribing targets to support better prescribing and underpins the 2024-2029 UK Antimicrobial Resistance National Action Plan.

The indication is displayed when hovering over the antimicrobial name:

Getting the right care is as easy as ABC

A

Ask yourself

Do I need to go out?
For information on treating minor illnesses and injuries from home, go to **NHS Inform** or download the **NHS 24 App**.

B

Be aware

There is help on your doorstep.
Your local **GP, pharmacy, dental practice and optician** offer a range of services.

C

Call 111

If it's urgent, or you're unsure, call **NHS 24** on 111.
They'll get you the care you need.

Unless it's an emergency - think ABC before visiting A&E.
