

Five Tips Before Interview

Re-read the job description and your application statement carefully.

01

Research the department and read any research or key policies for the dietetic service and health board.

02

Practice answers for questions based on 6 Cs, including examples. Chat to your references, friends, colleagues about what type of questions to prepare for.

03

Practice any presentations (including timescales). Think about questions you want to ask the panel.

04

Arrive early and know where you are going. Maybe do a “test run” and check out parking, where you are going etc.

05
