

# Five Tips During Interview

Make sure to have any relevant documents with you, such as a driving license, proof of residence or entitlement to work.

01

Be prepared, sometimes computers don't work. Consider bringing hard copies of presentations.

02

During your interview stay calm, be authentic, and smile. The interviewers are eager to learn more about you, so just be yourself!

03

Think positive, take time to listen to the questions and ask for clarification if needed.

04

At the end of the interview ask any relevant questions about the job role (not information you should know if you have read the job description).
