

## iD Expert Fix Net Pants

# Washing and Care Advice

### Benefits and Features

- Machine wash up to 60°C
- Wash up to 50 times
- Clearly labelled size and colour coded on waist band
- Available in packs of 5
- Tumble dry on low temperature settings

### Tips

- Use standard washing detergents, such as those used for home laundry
- For Care Home use, the pants should always be labelled with the user's name
- Net Pants are intended for individual use
- We recommend you do not cut the pants
- We recommend you do not use fabric softener

Machine Wash up to 60°C

Tumble Dry on Low Temperature

Do Not Bleach

Do Not Iron

Do Not Dry Clean

# Fitting Advice

## Fitting

1. Firstly, measure the user's waist (around the widest part) to establish the correct size. Hip and thigh size may also need to be taken into consideration (select waist size from the sizing table below).
2. When the pad is in place, pull the pants up, ensuring that the pad is in contact with the body, and that the legs of the pants are secure around the top of the leg. They should not be too tight.
3. When changing the pad, roll the fixation pant back down to the knee level, remove the soiled pad from the rear.
4. When fitting a new pad, it is recommended to repeat the fitting technique.

## Comfort Super - Size Information

Product Code	Product Name	Size	Colour	Waist Size	Pieces Per Pack
