Infection Prevention and Control Care Checklist - Group A Streptococcus

This Care checklist should be used with patients who are suspected of or are known to have Group A Streptococcus, while the patient is considered infectious and then signed off at end of the isolation period / discharge. Each criteria should be ticked \mathbf{v} if in place or \mathbf{X} if not, the checklist should be then initialled after completion, daily.

Patient Name: CHI:	

Date Isolation commenced:

	Patient Placement/ Assessment of Risk	Daily	check (v	/x)				
👱	Patient isolated in a single room with en suite facilities / own commode. If							
ent	a single room is not available, an IPCT <u>risk assessment</u> is completed daily							
em t of	(see Appendix 1) Stop isolation after 48hrs of appropriate antibiotic							
Plac	treatment and shown clinical improvement.							
Patient Placement /Assessment of risk	Place yellow isolation sign on the door to the isolation room							
ati Ass	Door to isolation room is closed when not in use. If for any reason this is							
	not appropriate then an IPCT <u>risk assessment</u> is completed daily							
					<u> </u>			
	Hand Hygiene (HH)			I	ı	1	I	I
	All staff must use correct 6 step technique for hand hygiene at 5 key							
	moments							
	HH facilities are offered to patient after using the toilet and prior							
	to mealtimes etc. (Liquid soap and water/wipes where applicable)							
	Personal Protective Clothing (PPE)				L			
	For patients with a Group A Streptococcal respiratory tract infection a				1			
	yellow apron and fluid resistant mask should be worn for direct care of							
	the patient or within their immediate environment. Disposable gloves							
S	must be worn when exposure to blood, body fluids and non-intact skin is							
ior								
aut	anticipated or likely. Eye protection should be worn if risk of blood and							
rec	body fluid splashing.							
A P	During aerosol generating procedures, FRSM or FFP3/Hood until patient							
sec	has been established on appropriate antimicrobial treatment for 48 hours.							
Ва	Bacteraemia, meningitis, wound infection or infection in other normally							
ion	sterile site there is no requirement for FRSM or FFP3.							
issi	Perform hand hygiene before donning and after doffing PPE.							
ısı	Safe Management of Care Equipment			T	1	I	I	T
ran	Single-use items are used where possible OR equipment is dedicated to							
_ &	patient while in isolation.							
0 8	There are no non-essential items in room. (eg. excessive patient							
ntr	belongings)							
S	Twice daily decontamination of the patient equipment by HCW is in place							
io	using 1,000 ppm solution of chlorine based detergent before rinsing off							
ect	and drying. Manufacturer's guidance should be followed for contact time.							
Standard Infection Control & Transmission Based Precautions								
ard	Safe Management of Care Environment Twice daily clean of isolation room is completed by Domestic services,			l		l	l	l
pu								
Sta	using a solution of 1,000 ppm chlorine based detergent before rinsing off and drying. Manufacturer's guidance should be followed for contact							
	, e							
	time. A terminal clean should be arranged on day of discharge/end of							
	isolation.							
	Linen and Clinical/Healthcare waste							
	All laundry is placed in a water soluble bag, then into a clear							
	plastic bag (place water soluble bag in the brown plastic bag used							
	in mental health areas), tied then into a red laundry hamper bag.							
	Clean linen must not be stored in the isolation room.							
	All waste should be disposed of in the isolation room as clinical/							
	Healthcare waste.							
Information for patients/carers	Information for patients and their carers							
	The patient has been given information on their infection/ isolation and							
	provided with a patient information leaflet (PIL) if available.				<u>L</u>			
ion ′caı	If taking clothing home, carers have been issued with a Washing							
nat ıts/	Clothes at Home patient information leaflet (PIL).							
orn tier	(NB. Personal laundry is placed into a domestic water soluble bag,							
Infi pat	then into a patient clothing bag before being given to carer to take							
	home)							
	HCW Daily Initial :

Date Isolation ceased/ Terminal Clean Requested:	. Signature:	Date:
--	--------------	-------

Table 1

List of AGPs

- Intubation, extubation and related procedures e.g. Manual Ventilation, open suctioning
- Tracheostomy/tracheotomy procedures
- Bronchoscopy
- Surgery and post mortem procedures in which high speed devices are used to open respiratory tract
- Dental procedures
- Non-invasive ventilation (NIV) e.g. Bi-level positive airway pressure ventilation (BIPAP), continuous positive airway pressure ventilation (CPAP)
- Hi-frequency oscillatory ventilation
- Induction of sputum

Appendix 1: Infection Prevention and Control Risk Assessment (for patients with known or suspected infection that cannot be isolated)

Addressograph Label:	Patient Name
and DOR/CHI:	

Daily Assessment / Review Required	COMMENTS	DATE						
Daily Assessment Performed by								
Initials								
Known or suspected Infection e.g. unexplained loose stools, MRSA,								
Group A Strep, C. difficile, Influenza, pulmonary tuberculosis.								
Please state								
Infection Control Risk , e.g. unable to isolate, unable to close door of isolation room.								
Please state								
Reason unable to isolate / close door to isolation room, e.g. falls								
risk, observation required, clinical condition.								
Please state								
Additional Precautions put in place to reduce risk of transmission,								
e.g. nursed next to a clinical wash hand basin, at end of ward,								
trolley containing appropriate PPE at end of bed, next to low risk								
patient, clinical waste bin placed next to bed space.								
Please state								
Infection Prevention and Control have been informed of patient's								
admission and are aware of inability to adhere to IPC Policy?								
Yes / No								
Summary Detail of Resolution		•	ı					ı

Daily risk assessments are no longer required
