This can be done by clicking 'Sign' shown with the arrow above. If you have not used this facility before you can add your electronic signature (you'll need it in a picture format) but if you have previously uploaded your signature it will be there.

Finally use the 'Save as' feature to save the file with an appropriate name. Doing this locks the request from editing and allows the electronic signature to be validated.

Please remember this is a legal document and must be signed by you not someone else – do not share your electronic signature with others. If these instructions are not followed the request will be invalid.
