Infection Prevention and Control Care Checklist – Measles

This Care checklist should be used with patients who are suspected of or are known to have Measles, while the patient is considered infectious and then signed off at end of the isolation period / discharge. Each criteria should be ticked \checkmark if in place or X if not, the checklist should be then initialled after completion, daily.

Patient Name:	
СНІ:	

Date Isolation commenced:

		Date:						
	Patient Placement/ Assessment of Risk			Daily	check	(√/x)		
농	Patient isolated in a single room with <i>en suite</i> facilities / own commode. If a							
Patient Placement / Assessment of risk	single room is not available, an IPCT risk assessment is completed daily.							
	Isolation required until 4 days after the onset of the rash. (Rash onset day is							
	counted as Day Zero)							
ent	Place yellow isolation sign on the door to the isolation room							
Pati Ass	Door to isolation room is closed. If for any reason this is not appropriate then							
_ `	an IPCT risk assessment is completed (Appendix 1) See over the page).							
	Hand Hygiene (HH)							
	All staff must use correct 6 step technique for hand hygiene at 5 key moments							
	HH facilities are offered to patient after using the toilet and prior to							
	mealtimes etc. (clinical wash hand basin/ wipes where applicable)							
	Personal Protective Clothing (PPE)							
	Disposable gloves and yellow apron are worn for all direct contact with the							
S	patient and their equipment/environment, removed before leaving the							
Ö	isolation area and discarded as clinical waste. HH must follow removal of							
ă.	PPE.							
eca	Staff should risk assess the need for face protection i.e. goggles/visor where							
P	they feel there is a risk of body fluid splashing onto the face and must be worn							
sec	when AGPs being carried out							
Ва	Staff are wearing fit tested FFP3 masks for all direct care.							
ion	When worn the mask must not be removed until the HCW has left the room,							
iss	it must be discarded immediately into the nearest clinical waste bin and hand							
Standard Infection Control & Transmission Based Precautions	hygiene undertaken.							
rar	Visitors participating in patient care should be offered appropriate PPE.							
8	Safe Management of Care Equipment	, , , , , , , , , , , , , , , , , , ,						
ō	Single-use items are used where possible or equipment is dedicated to patient							
Ţ	while in isolation.							
ŭ	There are no non-essential items in room e.g. Excessive patient belongings							
io	Twice daily decontamination of the patient equipment by HCW is in place							
ور اور	using 1,000 ppm solution of chlorine based detergent with 5 minute contact							
<u>-</u>	time before rinsing off and drying.							
ard	Safe Management of Care Environment	1	1					
pu	Twice daily clean of isolation room is completed by Domestic services, using a							
Sta	solution of 1,000 ppm chlorine based detergent with 5 minute contact time.							
	A terminal clean will be arranged on day of discharge/ end of isolation.							
	Laundry and Clinical/Healthcare waste		1					
	All laundry is placed in a water soluble bag, then into a clear plastic bag							
	(brown bag in mental health areas), tied then into a laundry bag							
	Clean linen must not be stored in the isolation room.							
	All waste generated in the isolation room should be disposed of as clinical							
	healthcare waste							
٦ S	Information for patients and their carers	1						
Information for patients/carers	The patient has been given information on their infection/ isolation and							
tio ;/ca	provided with a patient fact sheet if available							
ma	If taking soiled clothing home, carers have been issued with a Washing							
for	Clothes at Home Patient Information Leaflet. (NB. Personal laundry into a							
드렸	water soluble bag, then a patient clothing bag before being given to carer to take home)							
	HCW Daily Initial:		+
