

Moving Forward Together.

Moving Forward Together
Third Sector Event 19 June 2019
Introduction and Overview

Welcome

Today:

- Describe the Programme to transform health and social care services across Greater Glasgow and Clyde:

“Moving Forward Together”

- Explain why we need to make changes and our vision to transform services across the whole system
- Describe some of the feedback we have heard from people about our concepts of new ways of working and what matters most
- Outline our next steps to begin implementing the vision by:
 - Having conversations about the future of health and social care
 - Strengthening old and establishing new relationships
 - Creating platforms to work alongside each other to transform health and social care

What is Moving Forward Together

- Moving Forward Together is a **vision** to transform **healthcare** and **social care** services across **Greater Glasgow and Clyde**
 - It was developed by a **cross-system team** with **clinicians, frontline staff** and the six **Health and Social Care Partnerships**
 - It was reviewed by a group of **patients, service users, carers** and their representatives
 - It describes **new ways of working** that **provide safe, effective, person centred care**
- Aims to deliver **improvements in care and outcomes** for all patients service users and carers by:
 - Maximising our **available resources**
 - Making best use of **innovation and technology**

A blueprint for future delivery models

- It has been **approved** by NHSGGC Health Board and **noted** by the six Integration Joint Boards

- Sets our **strategic direction** of travel for the next **3 to 5 years** and beyond to meet future needs of the **whole population**

- It is aligned with **West of Scotland** and **Scottish Government** strategy and plans

We have and will continue to work with people on the concepts to hear **what matters most** to them to develop more detailed plans to transform services
