

## 24 hour Urine Collections

If you require a 24 hour urine container for a patient, please contact the laboratory direct to arrange for this to be sent to the GP surgery. Recently patients have attended hospital laboratories to ask for these containers as directed by their GP surgery. Laboratories are not patient facing areas and we would not encourage this.

## Clyde Sector

## Transport Manager Request

If the GP surgery is sending non biochemistry/haematology samples via the RAH/IRH sample hub please can samples be sorted into the correct areas as drivers are spending a significant amount of time sorting out samples. In addition, please ensure sample bags are closed as samples are often found out of bags and this increases the possibility of samples being lost.

## GP Transport Bags

Given the importance that **all samples** are placed in the correct coloured bags for onward transport to laboratories the list below may be of assistance showing the bags available through PECOS along with their order code.

<a href="#">278800</a>	198658	MIDCO PRINT + PACKAGING LTD	National Distribution Centre	£5.00	Box	£0.20/BX
