12.	<b>Chief Executive Update</b>		
	<p>Professor Jann Gardner, Chief Executive, provided a verbal update.</p> <p>Professor Gardner highlighted the purpose of the recent “Hackathon” event which was to discuss increasing virtual capacity within Hospitals across GGC, and to set out a strategic plan to harness the capability of the NHS GGC Health and Care System.</p> <p>Professor Gardner outlined the plans to establish an interface division. The plans included allocating funding and resources to collaborate with Community Partners and creating a Flow Navigation Centre (FNC) Plus. This centre would have 1000 virtual beds, offer clinics in various specialties, and be operational 24/7.</p> <p>Professor Gardner highlighted 5 points of access: General Practitioner referrals, the Scottish Ambulance Service, Emergency Departments attendees, those discharged who were clinically well and patients with chronic conditions.</p> <p>Professor Gardner outlined the plan to introduce a system enabling patients who require regular monitoring to access these services from home. It was noted that these patients would be provided with a device connected to an iPad, which would allow them to check their blood pressure, heart rate, oxygen levels and Electrocardiogram (ECG) within their own homes.</p> <p>Some concerns were raised regarding referral pathways into the service. Professor Gardner stated that the plan was to create a pathway to allow clinicians to refer patients to FNC Plus via phone or a virtual system.</p> <p>Professor Gardner noted the planned release of an NHS Scotland App within Glasgow within the next 1-2 years, which could allow patients access to some form of FNC Plus, including Medical Records and results.</p> <p>Professor Gardner briefly addressed the recent HIS Emergency Department Review and highlighted that all of the recommendations had been taken on board and would be addressed.</p> <p>The Forum were content to note the update.</p> <p><b><u>NOTED</u></b></p>		
13.	<b>Closing Remarks and Key Messages for the Board</b>		
	The Chair thanked members for their attendance and thanked Professor Gardner for the update provided.
