3:14 Community Arrangements for Nutritional Screening

On transition out into the community a patient may receive follow up nutritional care from an acute hospital referral or if necessary by acute or community dietetic teams and also the NHSGGC Health and Social Care Partnerships Home Enteral Nutrition Team.

In the NHSGGC Community Health & Social Care Partnerships The NHSGGC Community MUST Pathway is then followed which gives guidance using MUST on Malnutrition within the Community settings.

Healthcare Improvement Scotland (2014) Assessment, Screening and Care Planning *Standard 2.4 recommends*,

"recommends repeat screenings are carried out in line with clinical need and at a frequency determined by the outcome of the initial subsequent screenings in line with the validated tool's guidance"
