## Ophthalmology Clinic

During your visit to the Eye Department, your child may be assessed by up to three different members of the Eye Care Team. (Orthoptist, Optometrist and Ophthalmologist). Your child may also require eye drops to dilate their pupils to allow a test for glasses and a health check of the back of eye. These drops take up to 30 minutes to work, and your appointment may last up to two hours (and occasionally longer).

We advise that you leave plenty of time for your appointment and bring extra feeds and nappies if necessary.

We thank you in advance for your patience.
