**WARPIT HELPS LIMIT THE AMOUNT OF WASTE NHSGGC SENDS TO LANDFILL - AND REDUCE BOTH OUR DISPOSAL COSTS AND CARBON FOOTPRINT. WARPIT HAS ENABLED NHSGGC TO DIVERT NEARLY 18000KG OF WASTE FROM LANDFILL.**

A circular economy is a model in which we keep resources in use for as long as possible, extract the maximum value from them while in use, and then recover and regenerate products and materials at the end of each service life. NHSGGC Purchasing Lead and the team began using WARPit system in April 2017. WARPit is a resource reuse and management system designed to be straightforward for employees and to give surplus work items to other individuals inside the Health Board. The system includes listings of reusable furniture, fixtures and fittings, office consumables and electronic equipment that is no longer needed and is therefore up for grabs by other members of our Health Board.
